👤 Professional Summary

Passionate and results-driven **Computer Science student** with strong expertise in **full-stack web and mobile development**. Proficient in **JavaScript (Node.js/Express)** and **Python (Django)**, with specialized experience in integrating **Hugging Face LLMs** and **RESTful APIs** into scalable applications. Adept at database management, security implementation (**JWT/Bcrypt**), and developing cross-platform solutions using **React Native**.

🎓 Education

Sangam University

Bachelor of Technology in Computer Science

August 2023 – May 2027

GPA: **7.25/10.0** (till 4th semester)

- **Coursework:** Mobile Development, Web Development, Problem Solving.

Shrimati Sushila Devi Mathur Public School

12th PCM

2022 – 2023

Marks: **63%**

</> Technical Skills

Languages: JavaScript, Python, Dart, Java, C++, C

Technologies & Frameworks: Node.js, Express.js, Django, React Native

Databases: MySQL, MongoDB

💻 Projects

Go Planner 🐙 | *Node.js, Express, MongoDB, Hugging Face API, JWT, Bcrypt*

- **Architecture:** Developed "Go Planner," an intelligent travel assistant that generates personalized trip itineraries and day plans, built on a scalable *Node.js/Express* backend with *MongoDB* for data persistence.
- **AI & Integration:** Integrated **Hugging Face LLMs** to process natural language user requests for itinerary generation, and implemented public *Map and Weather APIs* to provide real-time location data and forecasts.
- **Security:** Secured user data and session management by implementing **JSON Web Tokens (JWT)** for stateless authentication and **Bcrypt** for robust password hashing.

Multi Shop 🖱️ 🐙 | *Python, Django, DRF, HTML, CSS, SQLite*

- **Architecture:** Designed a scalable B2C e-commerce application using Django's *MVT (Model-View-Template)* architecture, tailored for retailing distinct apparel categories for men, women, and kids while ensuring high availability.

- **API & Backend:** Engineered robust **RESTful APIs** using the *Django REST Framework (DRF)* to facilitate seamless product publishing, content management for the blog section, and secure client-server communication.
- **Database Design:** Implemented complex **ORM data models** to efficiently handle extensive product inventories, user authentication, and relational data between product categories and blog posts.

Certificates

Python for Data Science | NPTEL

- Gained knowledge about Python syntax, scientific computing using **NumPy**, and array operations.
- Understood data manipulation workflows with **Pandas** and data visualization techniques using **Matplotlib**.
